

## Female New Patient Package

The contents of this package are your first step to restore your vitality.

Please take time to read this carefully and answer all the questions as completely as possible.

### Medical History

Any known drug allergies: \_\_\_\_\_

Have you ever had any issues with anesthesia? ( ) Yes ( ) No

If yes please explain: \_\_\_\_\_

Medications Currently Taking: \_\_\_\_\_

Current Hormone Replacement Therapy: \_\_\_\_\_

Past Hormone Replacement Therapy: \_\_\_\_\_

Nutritional/Vitamin Supplements: \_\_\_\_\_

Surgeries, list all and when: \_\_\_\_\_

Last menstrual period (estimate year if unknown): \_\_\_\_\_

Other Pertinent Information: \_\_\_\_\_

#### Preventative Medical Care:

( ) Medical/GYN Exam in the last year.

( ) Mammogram in the last 12 months.

( ) Bone Density in the last 12 months.

( ) Pelvic ultrasound in the last 12 months.

( ) Hysterectomy. ( )

Tubal Ligation.

( ) Birth Control Pills. ( )

Vasectomy.

( ) Other: \_\_\_\_\_

#### High Risk Past Medical/Surgical History:

( ) Breast Cancer.

( ) Uterine Cancer.

( ) Ovarian Cancer.

( ) Hysterectomy with removal of ovaries.

( ) Hysterectomy only.

( ) Oophorectomy Removal of Ovaries.

#### Birth Control Method:

( ) Menopause.

**Medical Illnesses:**

- ( ) High blood pressure. ( ) Heart bypass.
- ( ) High cholesterol. ( ) Hypertension.
- ( ) Heart Disease.
- ( ) Stroke and/or heart attack.
- ( ) Blood clot and/or a pulmonary emboli. ( ) Arrhythmia.
- ( ) Any form of Hepatitis or HIV.
- ( ) Lupus or other auto immune disease. ( ) Fibromyalgia.
- ( ) Trouble passing urine or take Flomax or Avodart.
- ( ) Chronic liver disease (hepatitis, fatty liver, cirrhosis). ( ) Diabetes.
- ( ) Thyroid disease. ( ) Arthritis.
- ( ) Depression/anxiety . ( ) Psychiatric Disorder.
- ( ) Cancer (type): \_

# Female Testosterone and/or Estradiol Pellet Insertion Consent Form

Name: \_\_\_\_\_  
(Last) (First) (Middle)

Today's Date: \_\_\_\_\_

Bio-identical hormone pellets are concentrated hormones, biologically identical to the hormones you make in your own body prior to menopause. Estrogen and testosterone were made in your ovaries and adrenal gland prior to menopause. Bio-identical hormones have the same effects on your body as your own estrogen and testosterone did when you were younger, without the monthly fluctuations (ups and downs) of menstrual cycles.

Bio-identical hormone pellets are made from soy and are FDA monitored but not approved for female hormonal replacement. The pellet method of hormone replacement has been used in Europe and Canada for many years and by select OB/GYNs in the United States. You will have similar risks as you had prior to menopause, from the effects of estrogen and androgens, given as pellets.

Patients who are pre-menopausal are advised to continue reliable birth control while participating in pellet hormone replacement therapy. Testosterone is category X (will cause birth defects) and cannot be given to pregnant women.

**My birth control method is: (please circle)**

Abstinence      Birth control pill      Hysterectomy      IUD      Menopause      Tubal ligation      Vasectomy      Other

**CONSENT FOR TREATMENT:** I consent to the insertion of testosterone and/or estradiol pellets in my hip. I have been informed that I may experience any of the complications to this procedure as described below. These side effects are similar to those related to traditional testosterone and/or estrogen replacement. **Surgical risks are the same as for any minor medical procedure and are included in the list of overall risks below:**

Bleeding, bruising, swelling, infection and pain; extrusion of pellets; hyper sexuality (overactive Libido); lack of effect (from lack of absorption); breast tenderness and swelling especially in the first three weeks (estrogen pellets only); increase in hair growth on the face, similar to pre-menopausal patterns; water retention (estrogen only); increased growth of estrogen dependent tumors (endometrial cancer, breast cancer); birth defects in babies exposed to testosterone during their gestation; growth of liver tumors, if already present; change in voice (which is reversible); clitoral enlargement (which is reversible). The estradiol dosage that I may receive can aggravate fibroids or polyps, if they exist, and can cause bleeding. Testosterone therapy may increase one's hemoglobin and hematocrit, or thicken one's blood. This problem can be diagnosed with a blood test. Thus, a complete blood count (Hemoglobin & Hematocrit) should be done at least annually. This condition can be reversed simply by donating blood periodically.

**BENEFITS OF TESTOSTERONE PELLETS INCLUDE:** Increased libido, energy, and sense of well-being. Increased muscle mass and strength and stamina. Decreased frequency and severity of migraine headaches. Decrease in mood swings, anxiety and irritability. Decreased weight. Decrease in risk or severity of diabetes. Decreased risk of heart disease. Decreased risk of Alzheimer's and dementia

I have read and understand the above. I have been encouraged and have had the opportunity to ask any questions regarding pellet therapy. All of my questions have been answered to my satisfaction. I further acknowledge that there may be risks of testosterone and or estrogen therapy that we do not yet know, at this time, and that the risks and benefits of this treatment have been explained to me and I have been informed that I may experience complications, including one or more of those listed above. I accept these risks and benefits and I consent to the insertion of hormone pellets under my skin. This consent is ongoing for this and all future pellet insertions.

I understand that payment is due in full at the time of service. I also understand that it is my responsibility to submit a claim to my insurance company for possible reimbursement. I have been advised that most insurance companies do not consider pellet therapy to be a covered benefit and my insurance company may not reimburse me, depending on my coverage. I acknowledge that my provider has no contracts with any insurance company and is not contractually obligated to pre-certify treatment with my insurance company or answer letters of appeal.
